Dear Hiring Manager,

Subject: Application for the position of Data Analytics/Data Scientist

With due respect, by way of introduction, I am Mohit Singh, an MBA graduate from IIM Sambalpur with 3+ years of experience in data analytics, customer insights, and product strategy across leading BFSI sector. I am currently pursuing an advanced certification in Data Science & Decision Science from IIT Delhi, equipping myself with modern techniques in machine learning, data modeling, and predictive analytics. The advanced certification is nearing completion and expected to conclude by the end of this month. I am writing to express my interest in the position of Data Analytics profile.

In my tenure with HDFC Bank and IndusInd Bank, I have worked extensively on data-driven initiatives impacting millions of customers and generating measurable business value. My experience spans across building classification and churn models, segmenting large customer bases using ML techniques, designing A/B tests to optimize digital journeys, and deriving insights from complex datasets to support decision-making for credit, product, and investment strategies.

In my most recent assignment as Sr. Manager – Data Analytics at IndusInd Bank, I applied statistical and exploratory analyses on financial and market data to shape product decisions, resulting in a 25% increase in customer retention. Previously, at HDFC Bank, I built and deployed machine learning solutions for customer targeting, campaign optimization, and behavioral scoring—contributing to a 52% increase in digital adoption and a 34% uplift in CTR across channels.

Alongside hands-on analytics, I bring strong experience working with cross-functional teams, scaling data solutions across CRM platforms, and transforming business problems into quantitative frameworks. I am proficient in Python, Power BI, SPSS, Excel, and have worked on predictive models, NLP tasks, and portfolio optimization projects in both academic and corporate settings.

I am deeply motivated by the possibility of contributing to an organization, where I can apply my analytical skills and strategic thinking to help scale data-driven solutions. I welcome the opportunity to further discuss how my technical expertise, business understanding, and client-focused approach align with your team's needs.

Thank you for your time and consideration.

Sincerely,

Mohit Singh

EDUCATION

Master of Business Administration, Indian Institute of Management, Sambalpur	2020-2022
Bachelor of Science, Deshbandhu College, University of Delhi	2015-2018
Advanced certification in Data Science & Decision Science, Indian Institute of Technology, Delhi	2024-2025

SKILLS

Professional: Data Science, CRM Systems, Customer Data Tracking, Programming & Data Handling, Machine Learning & Modeling, Experimentation & Statistics, Visualization & Reporting, Product Analytics, Market Analysis & Strategy, Go-To-Market Strategies, Technology-Driven Solutions, Data-Driven Decision Making, Strategic Planning, Data & Decision Science

Programming Language & Tools: Python, Orange, Power BI, SPSS MS Excel, MS Power Point

WORK EXPERIENCE

Spyder Automation System – B2B Automation Solutions (Start-up Journey)	New Delhi, India
Co-Founder / Business Consultant – B2B Automation Solutions	Nov’2024 - Current
- Founded and scaled a B2B automation startup, owning end-to-end business strategy, client acquisition, requirement discovery, solution design coordination, vendor management, & delivery execution across client engagements. - Led client requirement discovery and solutioning, translating operational needs into automation workflows & coordinating with vendors and technical partners for implementation. - Managed cross-functional stakeholders including sales, operations, vendors, and delivery partners, ensuring alignment on scope, timelines, quality standards, and post-implementation client satisfaction.	

IndusInd Bank Ltd.	New Delhi, India
Sr. Manager- Data Analytics	May’2024- Sept’2024
<u>Project – Product Strategy Backed by Data Analytics</u> - Performed exploratory data analysis (EDA) and applied statistical modeling on financial statements and investment portfolios to derive actionable insights that informed product strategy. - Managed a diverse portfolio of high-net-worth clients by utilizing advanced CRM tools to track interactions, manage client data, and deliver personalized financial solutions, enhancing client loyalty and improving customer retention metrics. - Owned the end-to-end program lifecycle, leveraging quantitative opportunity assessments, advanced requirement mapping, and KPI tracking to ensure execution excellence within defined scope, timelines, and budget. - Orchestrated go-to-market programs with sales enablement, CRM, customer success teams, supported by predictive analytics on client engagement, resulting in a 15% increase in market penetration across cross product adoption curves. - Facilitated stakeholder engagement programs using insights from adoption metrics, behavioral data & sentiment analysis to design workshops, change management sessions, and continuous training initiatives that strengthened alignment. - Built weekly review dashboards to monitor CPM, CPA, call-to-conversion, talk-time efficiency, & agent productivity, planning.	

HDFC Bank Ltd.	New Delhi, India
Manager- Data Analytics	June’2022- April’2024
- Designed and executed data-driven campaign analytics (HDFC Bank initiatives, Festive Treats, Tata Neu Co-branded Credit Card) pipelines, analyzing customer journeys across digital and offline channels impacting 40M+ customers. - Implemented machine learning models for targeting and channel optimization (classification & look-alike modeling), driving rapid acquisition of 1M+ new credit card users. - Conducted A/B and multivariate testing with statistically significant analysis, improving CTR by 34% and lead quality by 18%. - Built customer lifecycle prediction models (churn, adoption, engagement scoring), leading to a 52% increase in adoption of digital banking features. - Developed predictive dashboards and KPI trackers using CRM and campaign data, enabling a 15% uplift in market penetration and improved decision-making. Orchestrated go-to-market programs with sales enablement, CRM, and customer success teams, supported by predictive analytics on client engagement—resulting in a 15% increase in market penetration and improved product adoption curves. Delivered customer-centric program outcomes through data-backed personalization strategies, enhanced feedback analytics, and personalization algorithms - CRM intelligence—resulting in a 25% rise in client satisfaction and engagement.	

IIT Delhi – Data Science - Decision Science	Oct’2024- Sept 2025
<u>Develop Statistical and machine learning techniques to a real-world dataset of customer reviews from Post Bank</u> Analyzed 16K+ Post Bank reviews using NLP, clustering, and predictive modeling (Logistic Regression, Decision Trees, Neural Network), achieving high sentiment prediction accuracy. Delivered actionable insights by linking message length and readability to customer dissatisfaction, enabling explainable, data-driven service improvements.	
<u>Develop a decision support system that selects the best suppliers based on both qualitative and quantitative factors</u> Built sentiment classifiers (Logistic Regression, Decision Tree, MLP) with 85%+ accuracy on 16K+ customer reviews; segmented users via clustering to guide response strategy.
